

Instrukcja SWITCH - KLUCZ

1. `Get-WmiObject -Class SoftwareLicensingProduct -Filter "Name LIKE '%Windows%' AND PartialProductKey <> null"`

2. `$license = Get-WmiObject -Class SoftwareLicensingProduct -Filter "Name LIKE '%Windows%' AND PartialProductKey <> null"`

3. `$license.LicenseStatusReason`

4. `switch ($license.LicenseStatus)`

```
{  
    0 { "Unlicensed" }  
    1 { "Licensed" }  
    2 { "OOBGrace"}  
    3 { "OOTGrace"}  
    4 { "NonGenuineGrace"}  
    5 { "Notification" }  
    6 { "ExtendedGrace" }  
    Default {}  
}
```

5. `$licenseDescription = switch ($license.LicenseStatus)`

```
{  
    0 { "Unlicensed" }  
    1 { "Licensed" }  
    2 { "OOBGrace"}  
    3 { "OOTGrace"}  
    4 { "NonGenuineGrace"}  
    5 { "Notification" }  
    6 { "ExtendedGrace" }  
    Default {}  
}
```

6. `echo "Stan licencji systemu to $licenseDescription"`
